Western Extension Project Public Exhibition

November 2026

Cleanaway Lucas Heights Resource Recovery Park is a waste management facility that accepts various waste types, including organic waste, cardboard, metals, limited sump oil, and vehicle batteries and features an Organic Resource Recovery Facility, which pre-processes organic materials for compost recycling.

Cleanaway plans to extend the landfill at this site to meet the urgent need for additional waste capacity in the Sydney region, as it's the area's only putrescible landfill. To address the impending landfill shortage in New South Wales, with available landfills expected to reach capacity by 2030, according to the NSW Government's Waste and Sustainable Materials Strategy 2041. More project details are available on the NSW Major Projects Portal.

Public exhibition

The Western Extension Project will be publicly exhibited for 28 days from Thursday 5 November - Thursday 3 December. This is an important milestone in the planning assessment process and provides the community with an opportunity to review project information and provide feedback.

During this phase, comprehensive plans and proposals for the Western Extension Project will be on exhibition to the public, enabling residents, stakeholders and interested parties to review, provide feedback and express concerns.

The exhibition aims to inform the public about the project's scope, benefits and potential impacts, encouraging active participation to help shape a solution that reflects the community's needs and priorities.

The documents related to the public exhibition can be found at: cleanaway.com.au/communities/western-expansion-project
