

Safety Alert October 2026

Kemps Creek Resource Recovery Park

Introduction

Ensuring the safety of our community, workers, and the environment is a shared responsibility. A crucial aspect of this is adhering to the designated No Stopping zones on the access road to the Elizabeth Drive Landfill site in Kemps Creek. With MIRVAC commencing construction directly across from the Cleanaway gates, we have already observed an increase in truck traffic and general road users, and this trend is expected to continue as construction progresses.

It is vital to keep the No Stopping area clear, as we frequently observe trucks illegally stopping in the No Stopping zone on the access road to the Resource Recovery Park. Maintaining this space is essential for smooth operations and accident prevention.

What is a No Stopping Zone?

You cannot stop your vehicle in a No Stopping zone at any point for any reason, unless there is an emergency.

- **Road Safety:** The No Stopping zone ensures safe passage along the access road for all road users. Trucks parking in the No Stopping zone forces others to cross double lines into oncoming traffic, creating safety hazards.
- **No Stopping zones:** Are established and enforced by the Penrith City Council; by not adhering to the No Stopping zone, a driver may incur a fine of \$330 or more.
- **Prevents Traffic Congestion:** Proper adherence helps avoid unnecessary traffic build-up, reducing delays for trucks and other vehicles using the access road.

Your Role in Keeping Our Community Safe

We urge all truck drivers and road users to:

- Adhere to all posted signage and instructions
- Be vigilant about No Stopping zone areas on the access road
- Report any concerns or violations to site management

Your cooperation is essential in maintaining a safe, efficient and respectful environment at the Elizabeth Drive Landfill.
